

1.3 kg

Very small, very light and in touch with the world. Optimised for blind rivets up to 3.0 mm diameter. Rivdom takes you into blind riveting of the future - on the back of decades of experience in the development of high-quality riveting tools and robotising/automating automation technology.

Extremely compact dimensions

Thanks to the removable transparent and very robust mandrel collector, the tool can be further shortened for **unusual ease of handling** even for the most confined installation points.

Newly developed clamping mechanism very fast and reliable gripping of the rivet mandrel is ensured by shorter nose pieces and optimised clamping jaws.

Completely tool-free maintenance

Clamping jaws and nose pieces can be replaced quickly, anywhere and by anyone immediately on the spot.

Colour coding of the union not possible for identification of application, work piece or end-user. Also available: **Mark for marking** of the hole of application instead in the same way on the belt clip.

Low Weight

Thanks to the oriented-oriented design and construction of all parts - eg. charging electronics placed in the charger - **very low weight of only 1.3 kg!**

Automatic and manual return

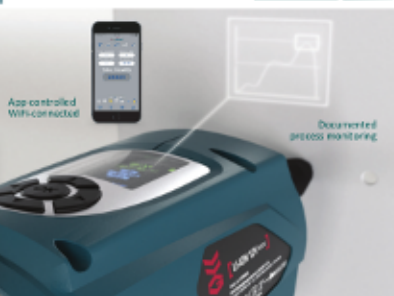

In addition to the manual setting, Rivdom also offers an automatic return mode. Immediately after the drop in the measured force with the shearing of the rivet mandrel, the tool moves back automatically to the starting position to keep the driving cycle as short as possible. Riveting is controlled via the app or the display.

Brushless motor

Max. rivet	3.0 mm
Max. mandrel	3.8 mm
Max. charging time	30 min.
Working stroke	30 mm
Working power	8,500 W
Weight	1.3 kg

- Intelligent controller**
- Qi-D display (1.5") with 3 buttons
 - Management of several devices
 - Many basic functions: Countdown, counters, statistics, signal tone
 - Service functions: Service intervals, countdowns, etc.
 - Individual interface programming possible

RIVDOM® TOOLING

NEXT GENERATION CORDLESS BATTERY RIVETERS

FEATURES INCLUDE

Steelmasters is pleased to announce its distribution of the new generation Rivdom series of battery operated tools. Featuring an extremely high traction force and long stroke length, these tools offer most level steel installation in capacity for a cordless tool.

Supplied with two batteries, a fast charger and heavy duty case, the Rivdom series offers a significant advantage over other alternatives on the market.

- 1 LIGHT WEIGHT AND EXCELLENT ERGONOMICS
- 2 EXTREMELY FAST BATTERY CHARGER
- 3 BRUSHLESS MOTOR*
- 4 ILLUMINATION LAMP
- 5 MANDREL HOLDER
- 6 PRACTICAL BELT CLIP

*Brushless Motor available on Rivdom TWO, Rivdom TWO.2 and Rivdom TWO.8

Rivdom ONE™

Get to know the new Rivdom ONE - you will be impressed!

Blind rivets up to 3mm diameter (all materials) are reliably set by the powerful motor and optimised clamping mechanism.

As with all other tools from the current Rivdom generation, the Rivdom ONE also has union batteries with **RivdomPLUS charging technology**, and is supplied as standard with the **intelligent i-Box system**. The new housing is characterised by its **balancing ergonomics and reduced weight**.

The new trigger has an **extremely short travel** and thus permits quick and accurate riveting.

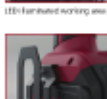

For the practical details such as the **transparent mandrel collector**, **LED lighting** of the riveting location or the new **belt clip** for mobile use, round off the convincing impression of the new Rivdom ONE.

NEXT GENERATION BATTERY RIVETERS

Now with a range of innovations:

- RivdomPLUS charging technology
- In the practical i-Box
- Reduced weight
- Improved ergonomics
- Short trigger stroke
- Weight for accessories
- Integrated mandrel holder
- Practical belt clip

Max. rivet	3.0 mm
Max. mandrel	3.8 mm
Max. charging time	30 min.
Working stroke	30 mm
Working power	13,000 W
Weight	1.8 kg

Rivdom TWO™

This single notice that a great deal of experience in riveting technology has gone into the development of this tool... All-in-all - just perfect for me!

Rivdom TWO - the powerful battery riveter. Designed and developed for blind rivets up to 4.0 mm diameter (all materials) - also for high-strength materials!

With a **working force of 20,000 N** and a very large **stroke of 30 mm**, not only standard blind rivets and high-strength weldnuts or compound products can be set, but also filling blind rivets can be quickly and reliably processed in one step.

The Rivdom TWO also has a **new housing** with greatly improved ergonomics and the familiar range of accessories of the Rivdom family.

Brushless and wireless. The newly developed brushless BLDC direct current motor for Rivdom TWO provides rivets with an almost limitless, durable life cycle.

20,000 N working force
30mm stroke
Brushless motor

- Brushless Motor
- Reduced weight
- Improved ergonomics
- Short trigger stroke
- Hanger for balancer
- Mandrel holder
- Practical belt clip

Max. rivet	4.0 mm
Max. mandrel	4.8 mm
Max. charging time	30 min.
Working stroke	30 mm
Working power	20,000 W
Weight	2.0 kg

Rivdom TWO.8™

Rivdom TWO.8 - for maximum power in mobile riveting!

With an enormous setting force of **24,000 N** and the perfect balance of clamping jaws and clamping mechanism, enables processing of **high-strength blind rivets** from 4.0mm to 7.0mm diameter is guaranteed. Most of the clamping jaws 7-Piece stainless steel.

2.8

Max. rivet	7.0 mm
Max. mandrel	8.0 mm
Max. charging time	30 min.
Working stroke	30 mm
Working power	24,000 W
Weight	2.1 kg
